

FIG. 1

FIG. 3

A hand-drawn schematic diagram of a medical device, possibly a catheter or probe. The device consists of a long, thin shaft (51) with a handle (52) at one end and a distal tip (54) at the other. The handle (52) has a control knob (48) and a trigger (38). The distal tip (54) features a needle (55) and a sensor or probe (60). The device is shown in a cross-sectional view, with internal components like a wire (39) and a lumen (61) visible. The entire assembly is housed within a protective sheath (26). Other labels include 26, 38, 39, 48, 51, 52, 54, 55, 60, 61, and 267.
